PROJECT 3 / MM-621

FORECAST MEAL

One local forecast. One good meal idea.

Ken Pao · November 11, 2026

A healthy meal idea for busy college students.

Based on the local weather forecast.

TARGET AUDIENCE

Students who prefer cooking at home and want simple, healthy recipes.

Forecast Meal

Basket Buddy found a freshness problem.

Hayward snapshot · 50 miles

9.2%

of 42,342 prices were reported in the previous 30 days.

288

The pivot is a clearer question.

Not: Can we find every grocery price?

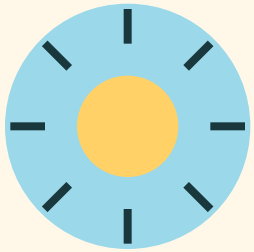

Instead: What meal fits today's forecast?

Eat AI already connects meals and weather. My class test is one focused local flow.

Give dinner a little context.
